Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4, 6, 9-13, 15 and 16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Miller (USP 6,320,358). Miller discloses a changeover switch connected in a push pull configuration, see figure 2, with load connected between the series connection of an inductor and capacitor connection.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 5 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller (USP 6,320,358). Miller discloses the claimed invention except for the use of JFET's. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have JFET's since it was known in the art that the use of a differing switch technology is notoriously well known in the art to utilize the inherent characteristics of the specific switch technology for the benefit of the circuit.

7. Claims 7-9 and 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller (USP 6,320,358) in view of Watanabe (USP 6,710,582). Miller discloses the claimed invention except for controlled monitoring device, which evaluates load current. Watanabe discloses that it is known in the art to provide controlled monitoring device, which evaluates load current. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to provide the controlled monitoring device which evaluates load current of Watanabe with the energy management device/ circuit of Miller, in order to provide a controlled output responsive to the detected load current/voltage.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bao Q. Vu whose telephone number is (571) 272-2088. The examiner can normally be reached on Monday-Fridays, 8:00AM- 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael S. Sherry can be reached on (571) 272-2084. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
